Items listed under the *Category* column reflect course categories – generally, types of assignments – as created by teachers in STIClassroom. Typical categories include quizzes, reading assignments, homework or term papers.

Teachers may choose to make each category count for a specified percentage of the overall grade for the course. Various *Activities* comprise each category; for example, *Read pp. 56-78* could be an activity for the *Homework* category.

Homework Lesson Plan Grade Book **Attendance**

- *Daily Attendance* reflects whether or not a student is counted as present or absent for the full school day. The criteria for this determination is set up according to standards set by the school, district, county or state.
- *Period Attendance* is used to track a student’s presence in each class during the school day. In some cases, *daily* attendance is determined based on period attendance; that is, the number of periods (or minutes, in some cases) for which a student is present at school can be used to establish the student’s status as present or absent for the full day.

All tardies and/or absences are listed by date, with the most recent date at the top of the list. Use the scroll bar to the right of the list to move up and down the list, if applicable.

## Period Absences

Period absences are listed below daily absences. *Period* attendance refers to a student's presence in or absence from any particular period; a student who misses multiple periods during a single day may still be considered presence in terms of daily attendance, depending on the attendance criteria set up by the school.

## Check In / Out

Check-ins and check-outs are used to track students who leave and/or return to school during the day for legitimate purposes, such as visits to the doctor. Students are generally checked out by the office when they leave school, and checked in when they return.

---

Note: *Check-In/Out* should not be confused with *Entry/Withdrawal*. The latter procedure is used to determine the student's registration status for the current year, as either a currently enrolled student (for whom an *Entry* record has been created) or a withdrawn student (for whom a *Withdrawal* record is created).

---

A list of all check-ins and check-outs is displayed at the bottom of the *Attendance* view, as shown in the screen shot below.
